CASE STUDIES

WEB / MOBILE APP

AGRITUN

A web/mobile application designed to optimize olive harvesting during infestation periods. It includes modules for parcel management, harvest coordination, team organization, olive transportation to the mill, oil mill management, sales, purchasing, and comprehensive statistics.

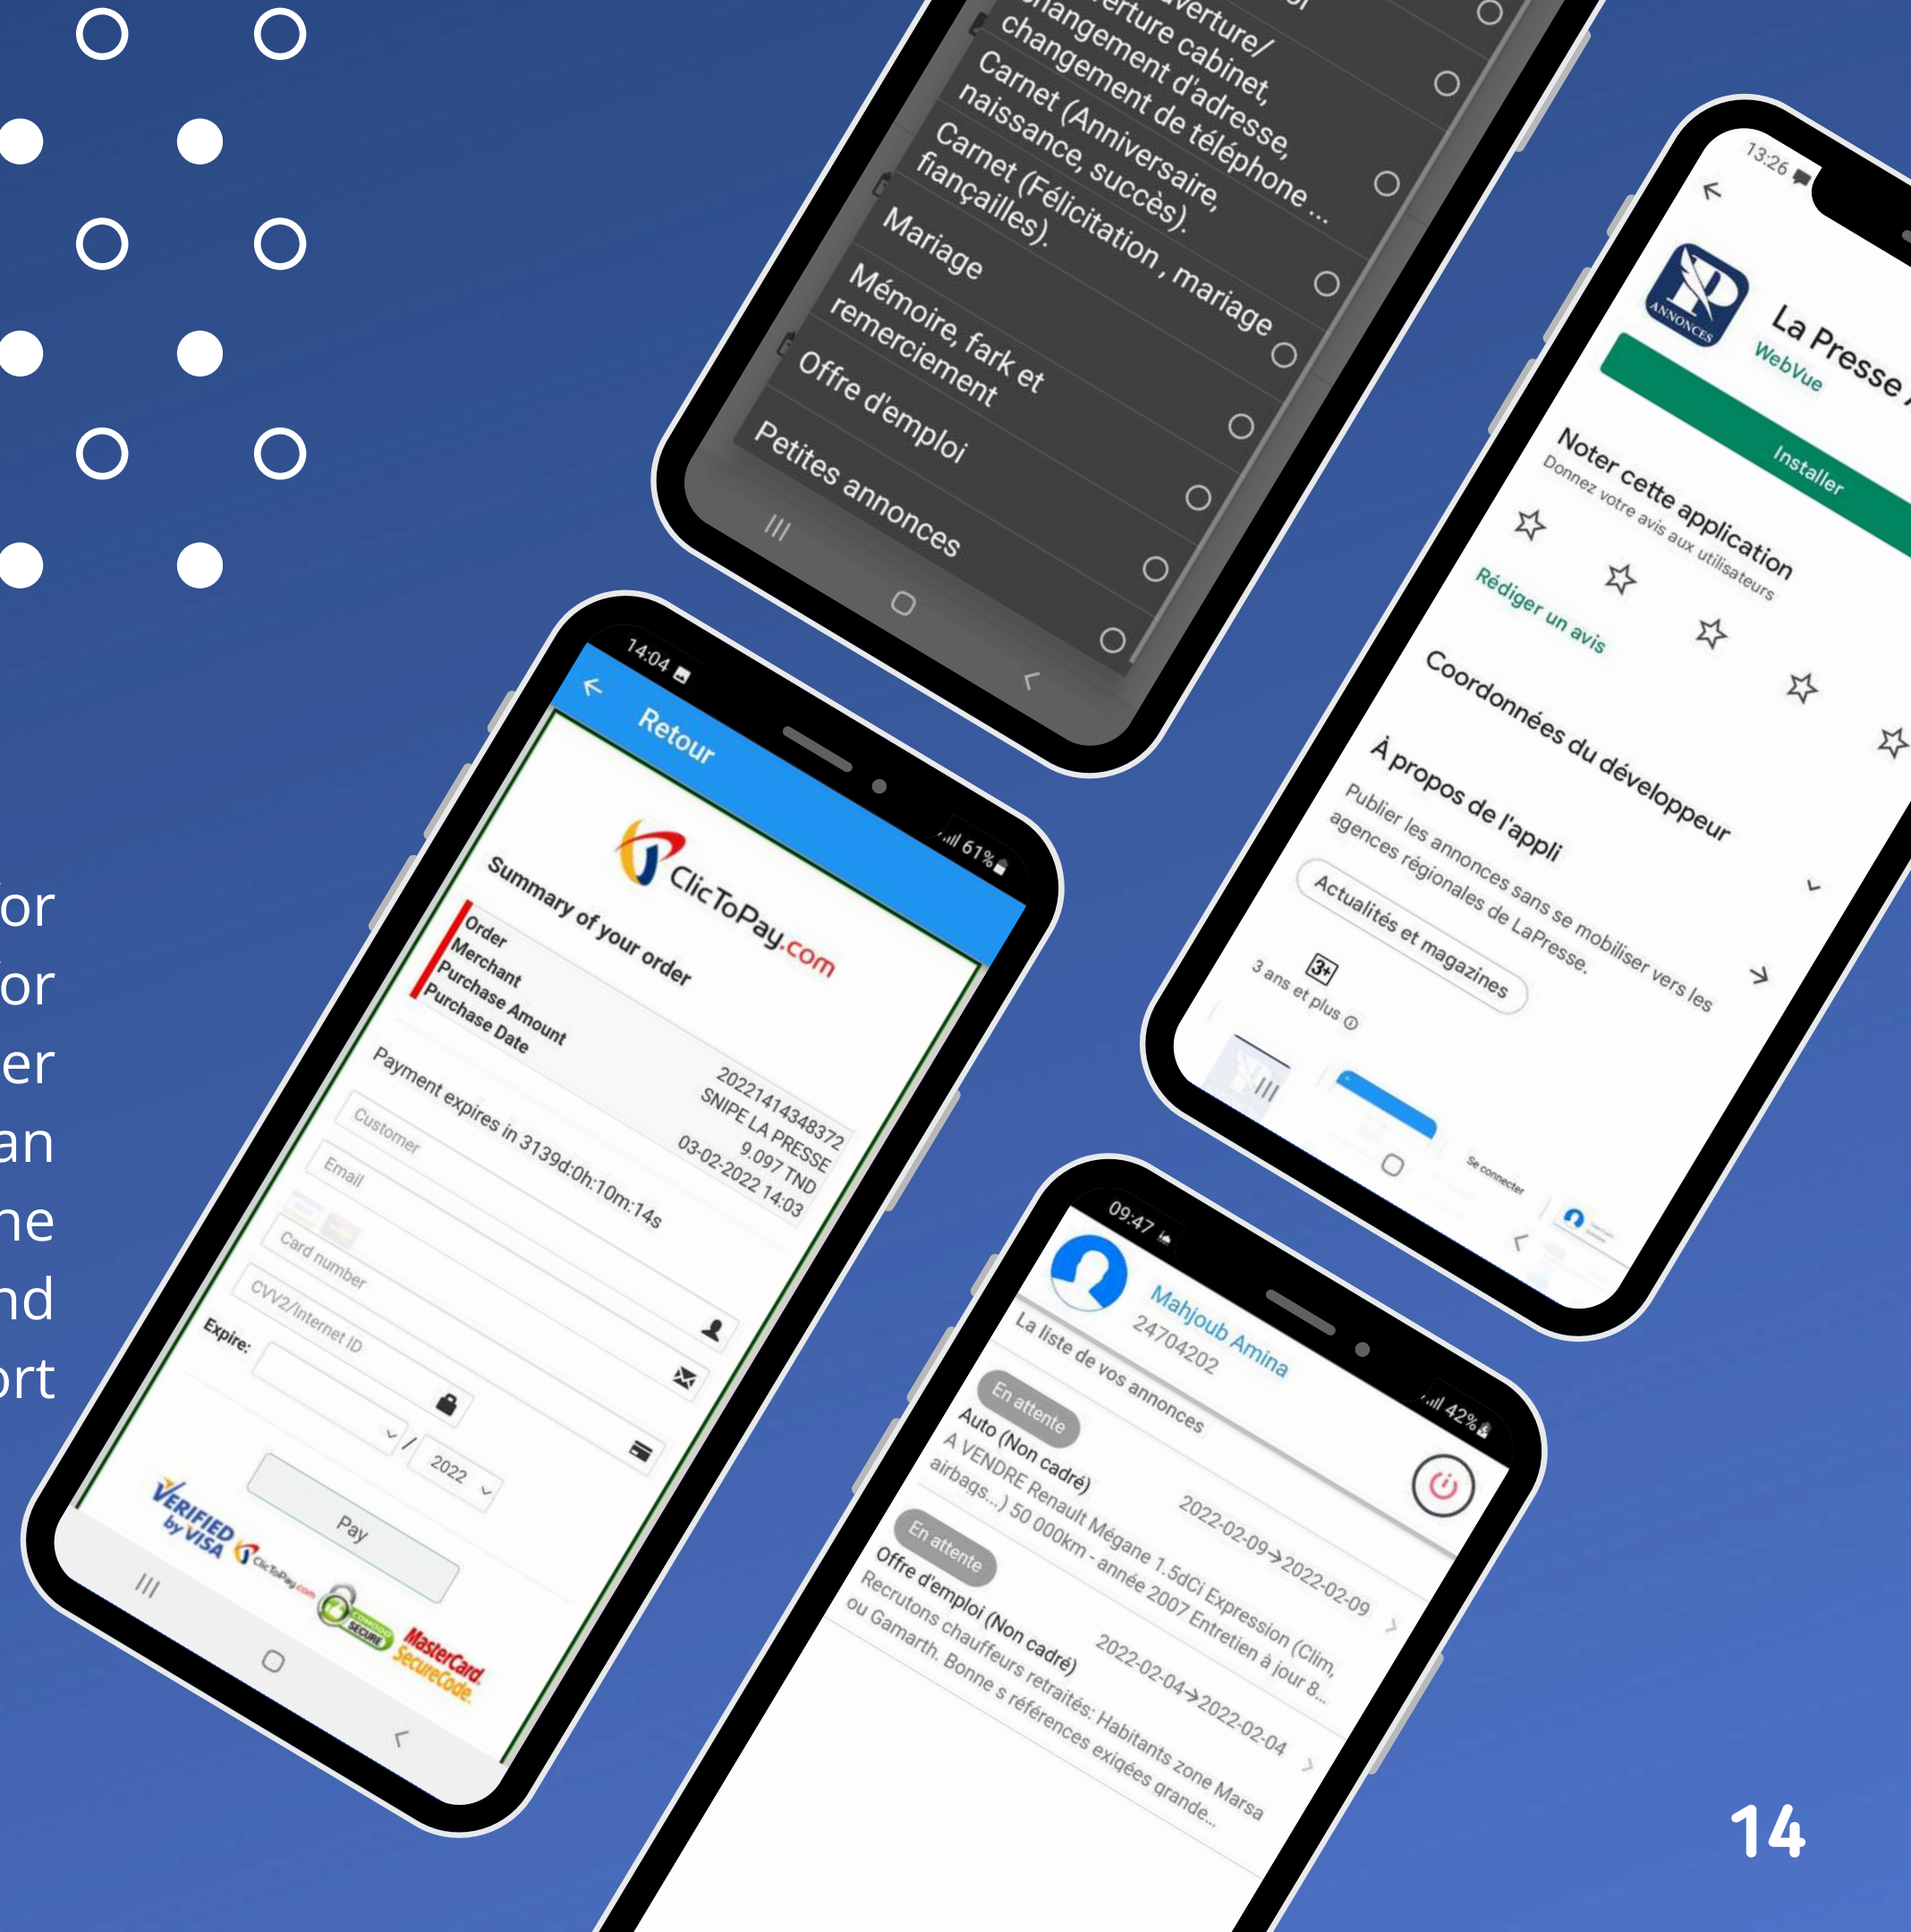

MOBILE APPLICATION.

LA PRESSE ANNONCE

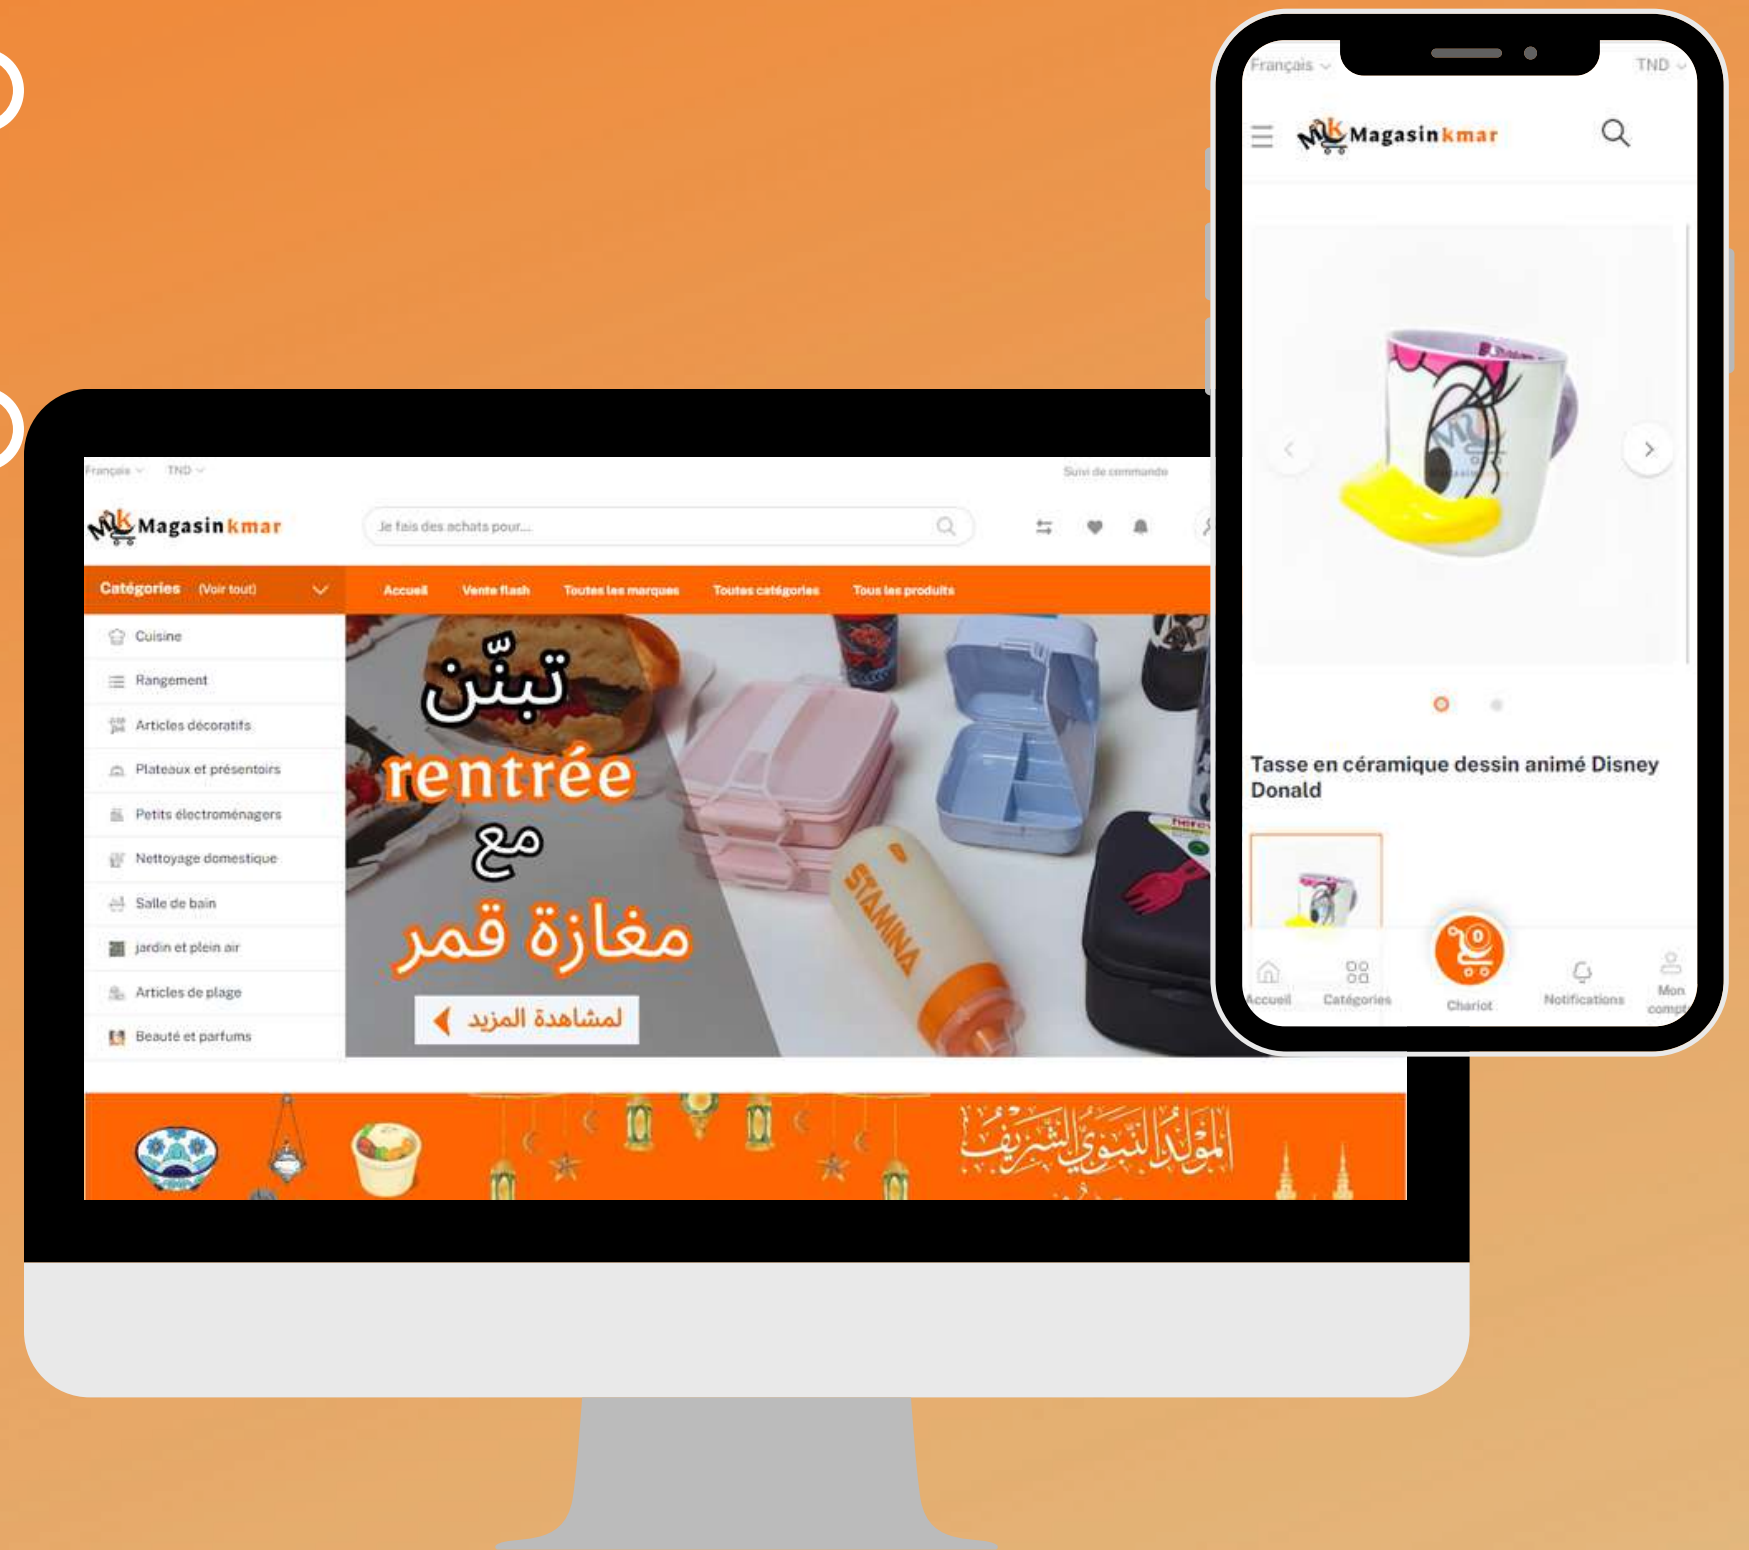

A mobile application simplifies the process for users seeking to locate the nearest agency for newspaper advertisement placement. Rather than visiting a physical agency, users can conveniently download the application from the Play Store, compose their advertisement, and complete the payment process from the comfort of their home or workplace.
